* Bosch – top selling front load washing machine brand (unit sales and sales value) 2012. Ranked by one of the world's leading independent market researchers.

Technologies that not only improve our life today, but tomorrow as well.

Even if it does sound old-fashioned, at Bosch we are still building our appliances the way we did 125 years ago. Our standards have always remained the same: nothing leaves our factory until it is 100% perfect in terms of quality, performance and sustainability. That is why we sometimes take more time to research, develop and test our appliances. We have remained true to the principle of Robert Bosch all those years ago; we would rather lose money than the trust of our customers. And we think that this is actually quite modern.

Green Technology inside
This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies – and, like all Bosch products, have been manufactured with the aim of minimizing their impact on the environment. The signet stands for the resource-efficiency of our products – quite simply, for their ‘Green Technology’.

- EcoSilence Drive® motor with 5 Star WELS water rating and 4 Star energy rating
- VarioPerfect® washing logic for optimum water and energy consumption
- ActiveAir Heat pump dryer with 6 Star energy rating
- Avantixx first washer/dryer in the world that dries without water
- New premium class washing machine and dryer: HomeProfessional

German Engineered

Bosch quality
Over the years, Bosch has been surveyed to be one of the most reliable brands of washing machines by a leading independent consumer organisation in Australia.

Every Bosch washer to leave our factory complies with stringent standards. All sub-assemblies and components undergo thorough inspection before they are included in the production of your new Bosch washing machine. To demonstrate our commitment to quality, a further 2-3% of all production is resubmitted for quality audits. We stand proud by all our products when they leave the factory so you have the confidence you have come to rely on when your appliance arrives. We back this up with a 2-year national warranty and an extensive after-sales service network throughout Australia.

ECARF
Allergy-friendly
Quality Tested
www.ecarf.org
European Centre For Allergy Research Foundation

What is ECARF?
ECARF promotes 'For a better life with allergies,' it is the European Centre for Allergy Research, founded in Berlin in 2003. The ECARF quality seal stands for certified quality standards and is designed to help allergic patients select appropriate goods and services.

A number of Bosch models have received the ECARF quality tested seal: WAE22462AU, WAE24462AU, WAS28461AU, WAS28440AU, WAY32540AU.

The Anatomy of Bosch Washing.

User-friendly interface

Stylish, straightforward control panel with JogDial for easy selection of wash programs, spin speeds, temperature and other functions.

VarioPerfect

VarioPerfect ensures top wash results for all types of fabrics and every load. With EcoPerfect, most programs can be set to be more efficient saving up to 65% in energy consumption, while SpeedPerfect can cut your wash time by up to 50%#.

ActiveWater™ technology

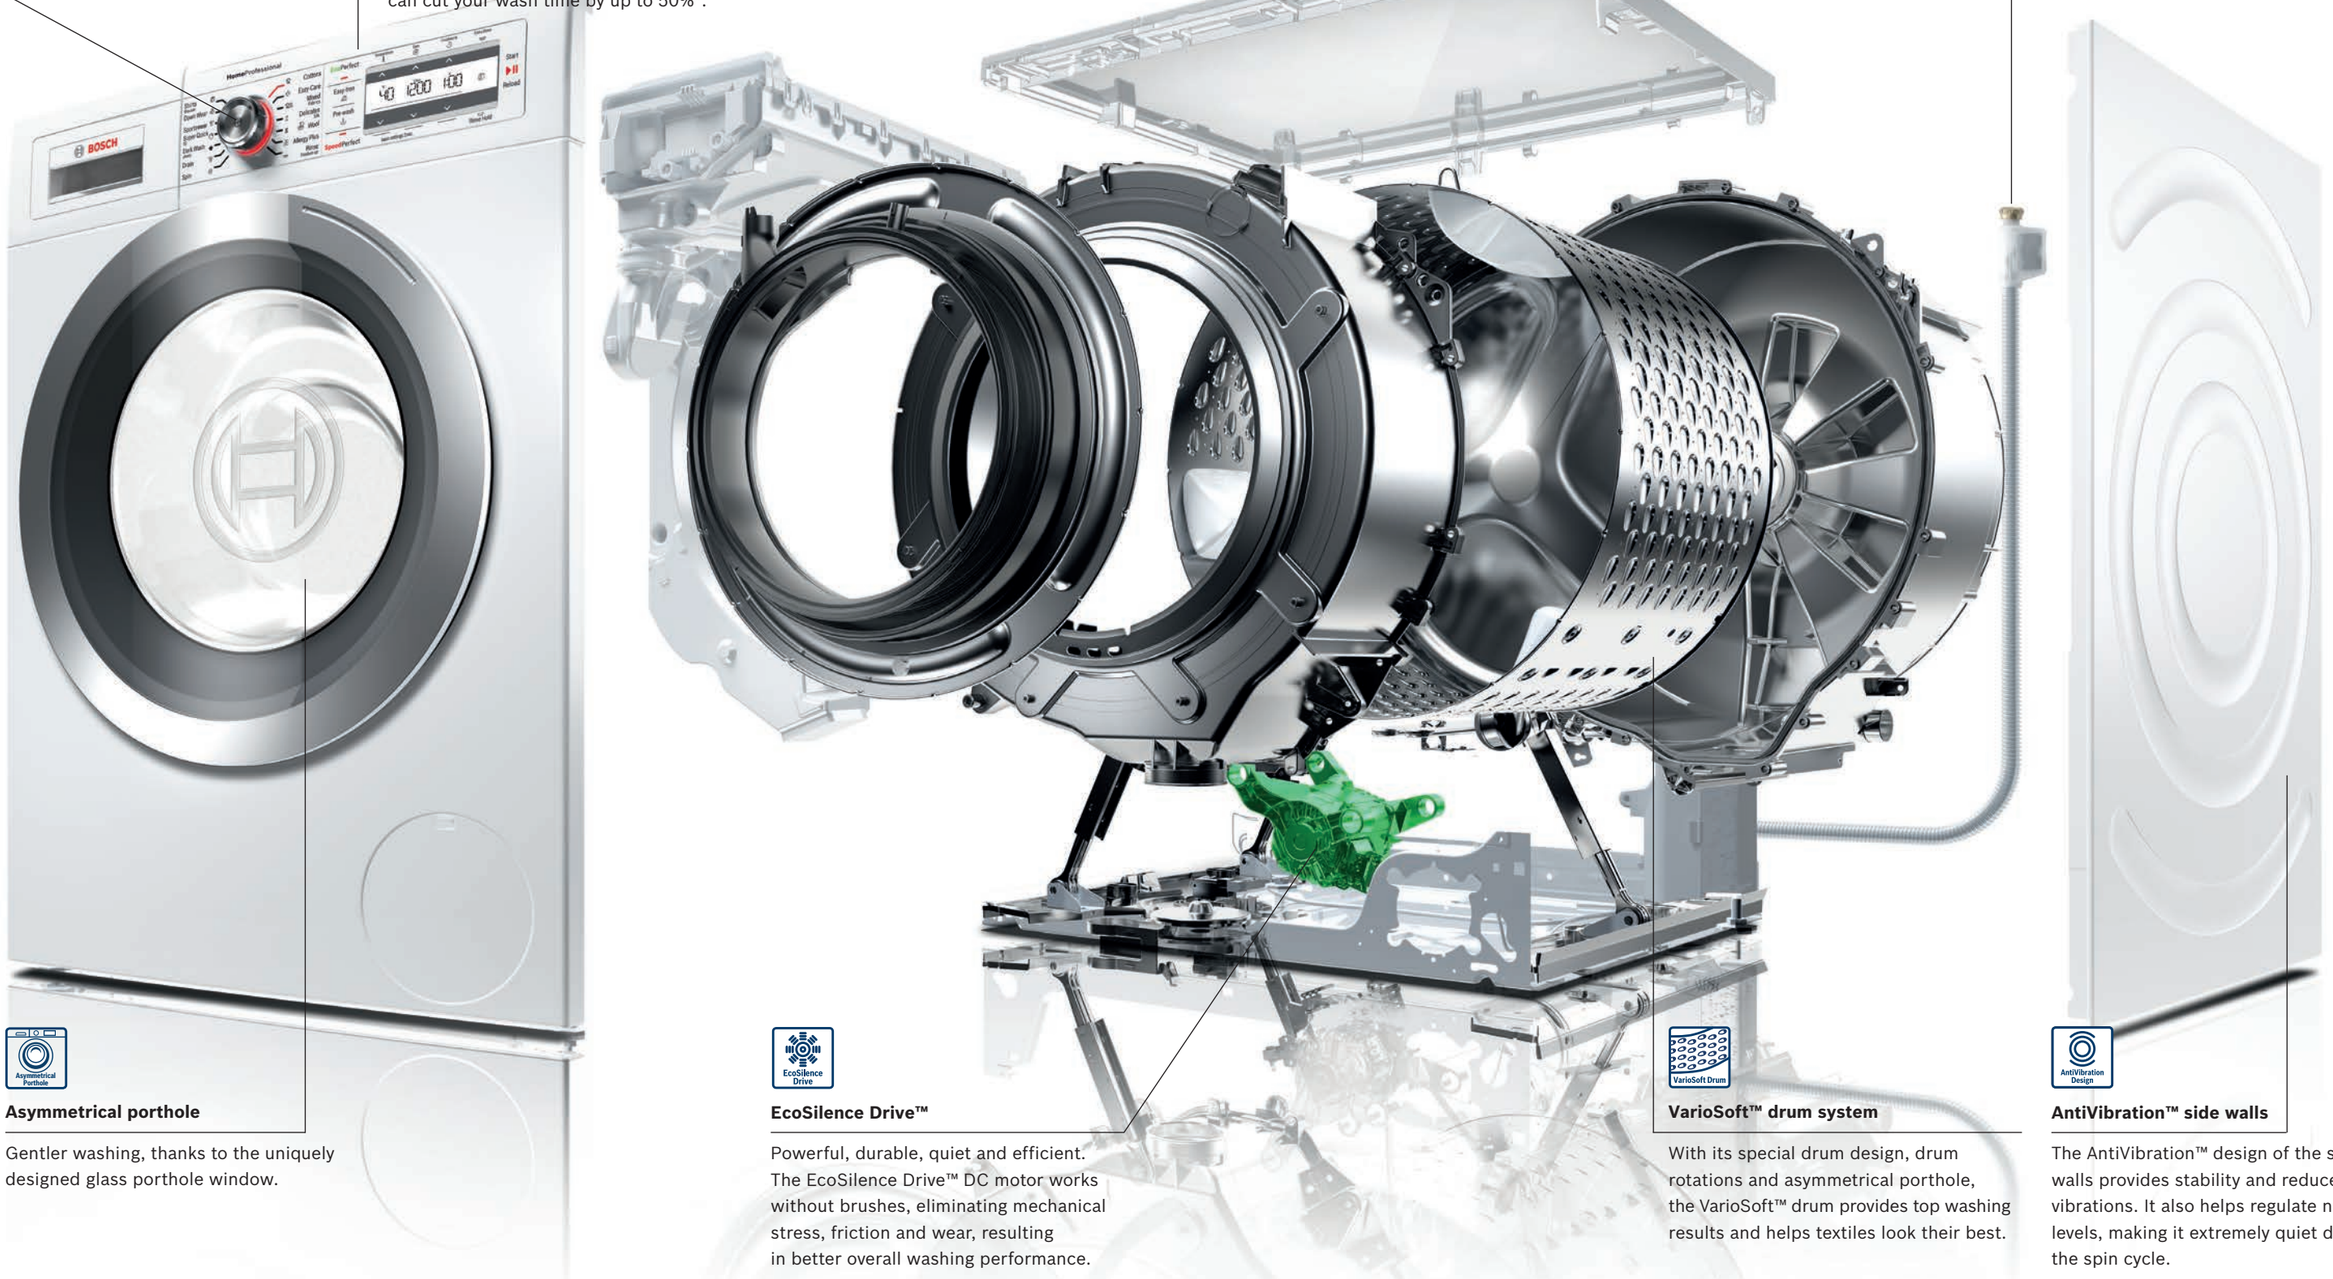
An automatic load sensing function, that adapts the water consumption to the relevant load size. This means that 1 kg of laundry can be washed just as efficiently as a full 8 kg load.

AquaStop™ anti-flood protection

The AquaStop™ system provides 100% anti-flood protection*. Bosch guarantees it for the entire service life of the appliance.

Sensor technology

A network of intelligent sensors automatically control the wash process that not only ensures perfect wash results, but minimal water and energy consumption.



Asymmetrical porthole

Gentler washing, thanks to the uniquely designed glass porthole window.

EcoSilence Drive™

Powerful, durable, quiet and efficient. The EcoSilence Drive™ DC motor works without brushes, eliminating mechanical stress, friction and wear, resulting in better overall washing performance.

VarioSoft™ drum system

With its special drum design, drum rotations and asymmetrical porthole, the VarioSoft™ drum provides top washing results and helps textiles look their best.

AntiVibration™ side walls

The AntiVibration™ design of the side walls provides stability and reduces vibrations. It also helps regulate noise levels, making it extremely quiet during the spin cycle.

Features vary depending on model. Please check individual product specifications.

Features vary depending on model. Please check individual product specifications. * Must be connected and switched on at the mains.
Based on an average across Bosch washing machines. Program setting for testing according to valid European standard EN60456. Tested on overseas model.

AntiVibration™ design

Sound of Silence

Psst! The special AntiVibration™ design of the side walls makes Bosch washing machines extremely quiet. It helps reduce vibrations and ensures greater stability. Just in case you want to do the washing at night.

Features vary depending on model. Please check individual product specifications.

EcoSilence Drive™

Green Technology inside

Intelligent

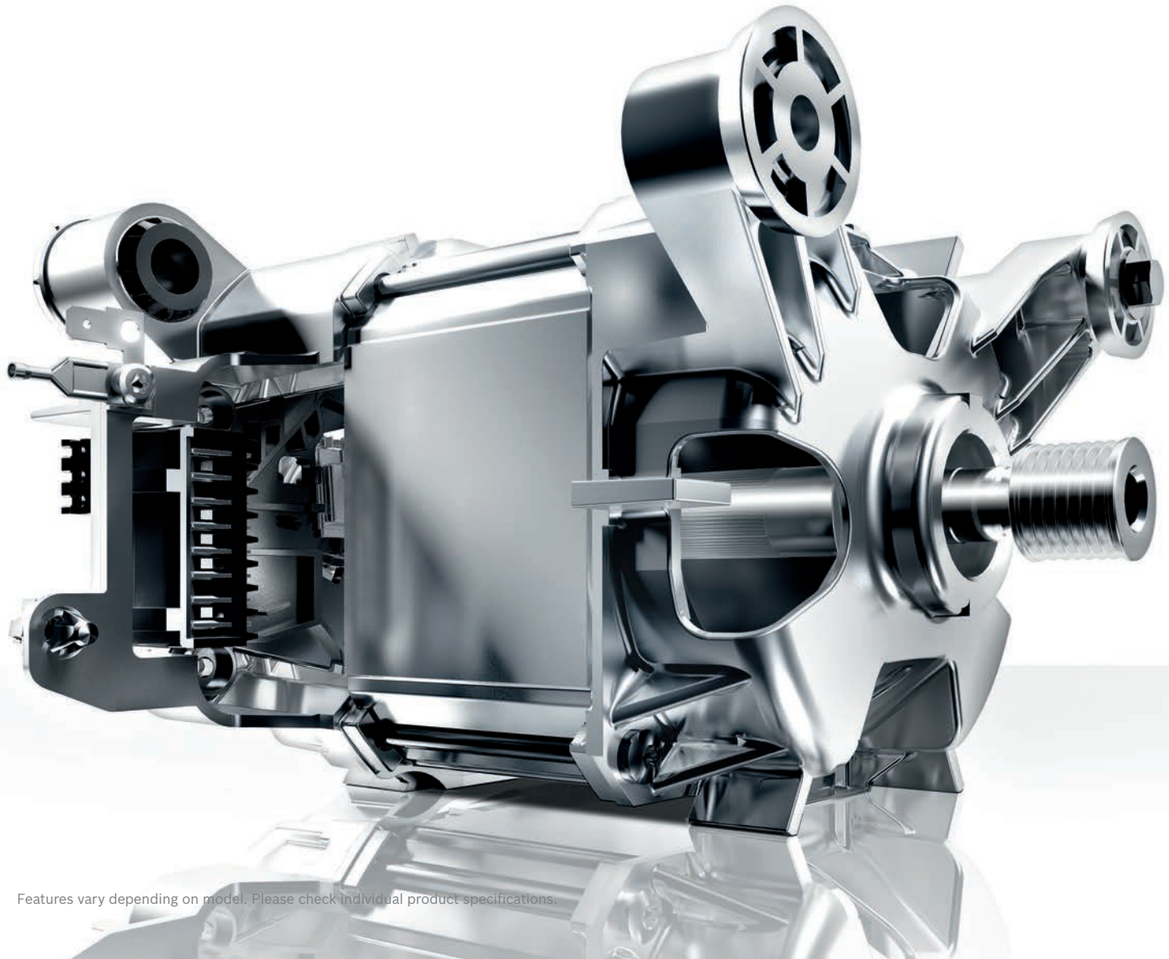
EcoSilence Drive™

Strong
We developed Bosch's most powerful motor to date: the EcoSilence Drive™. Instead of supplying electricity to the rotating armature via carbon brushes, we equipped the armature itself with extremely strong permanent magnets.

Long-lasting
Friction generates heat, by dispensing with carbon brushes, the EcoSilence Drive™ won't heat up and won't wear.

Economical
The EcoSilence Drive™ sets a new benchmark in economy. After all, without carbon brushes no more inhibiting friction is generated in the motor. Therefore, the EcoSilence Drive™ can use its full power to drive the washing machine without any energy losses.

Quiet
As there is no friction from carbon brushes, there is also no excessive motor noise. That makes the EcoSilence Drive™ one of the quietest motors in its class and the best example that 'less can indeed be more'.



Features vary depending on model. Please check individual product specifications.

VarioSoft™ drum

Intelligent

The VarioSoft™ drum
With its unique raindrop structure, the VarioSoft™ drum always adapts perfectly to every situation. Two different drum rotations are used depending on the wash program. In one direction, the flat sides of the rain droplets are extremely soft on fine textiles. If the drum rotates in the opposite direction, the steep sides ensure intensive cleaning for heavily soiled garments.

Textiles are treated with the care they deserve.
The glass of the special asymmetrically curved porthole softly projects into the VarioSoft™ drum. It gently returns washing back into the centre of drum on each rotation, ensuring even circulation.

Features vary depending on model. Please check individual product specifications.

Wash programs and options

Flexibility

Wash programs

In addition to the standard wash programs, the following special programs are available on certain models.

Allergy Plus
A higher water level, extra rinse cycles and a higher water temperature (e.g. 60°C) wash away detergent residues left in the laundry for exceptional hygienic cleaning. Good news for those with sensitive skin.

Reload Function
Reload Function allows you to add additional items of laundry after the program has started if it is within safe water and temperature levels.

SpeedPerfect
Reduces program times for the fastest wash possible - perfect for when speed is of the essence.

EcoPerfect
Allows most programs to be more efficient and is the ultimate program for saving energy.

Express 15 / Express 30
A short wash program of approximately 15 minutes for up to 2 kg of lightly soiled washing or a 30 minute wash program for up to 3.5 kg. Packing in a wash, with extra rinse cycles and improved rinse spinning, this is one of the shortest complete wash programs.

PowerWash 60
The PowerWash 60 program for medium soiled loads for up to 5 kg, provides excellent wash results in just 60 minutes.

Down Wear
Down feathers are optimally moistened and washed gently. Down quilts also have ample room in the large VarioSoft™ drum.

Shirts/Blouses
This program is ideal for 2 kg of shirts and blouses. The gentle spin cycle makes ironing effortless and for greater convenience, no-iron shirts can simply be hung to dry.

Dark Wash
Dark clothes, particularly jeans, often need special treatment. The Dark Load program suitable for cotton and synthetic textiles, features low water temperatures, which provide better wash results for darker garments. The gentle washing action helps protect fibres against bleeding and keeps dark clothes looking new. During the spin intervals, a small amount of residual moisture in the fabric prevents the laundry from creasing, which helps reduce ironing time.

Delicates/Silk Program
A wash program suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C, and depending on the fabric wash instructions, may be increased to 40°C or even reduced to a cold wash to provide a temperature-controlled wash.

Wool Program
The wool program is tailored to give the optimum treatment for wool garments. It offers a gentle wash action at an optimum temperature of 30°C. The gentle spin at the end of the cycle extracts water gently, which helps garments retain their shape.

Pre-wash
For stubborn stains or heavily soiled garments, a prewash will loosen dirt and remove it prior to the main wash.

Mixed Load
A program designed to wash mixed fabrics of up to 3.5 kg in up to 60 minutes. Ideal for garments that need to be washed urgently, without the need to wait for a full load.

Sportswear
The Sportswear wash program is designed specifically for functional and sports fabrics with micro-fibre technology, like those used for gym, cycling or jogging. The program offers two rinse cycles with a gentle washing action for greater fabric protection.

Cottons Eco
For even greater efficiency, Bosch has developed a program for the resource-savvy. On selected models, the Eco Wash program offers an initial 60 minute wash cycle before the first rinse. Ideal for light-to-medium soiled garments, the longer wash reduces resource consumption, while still providing impressive wash results.

Easy Iron
Clothes are tumbled gently during the normal program spin cycle and then at the end of the spin phase. This keeps laundry fluffy and tangle-free for reduced creasing and easy ironing.

Features vary depending on model. Please check individual product specifications.

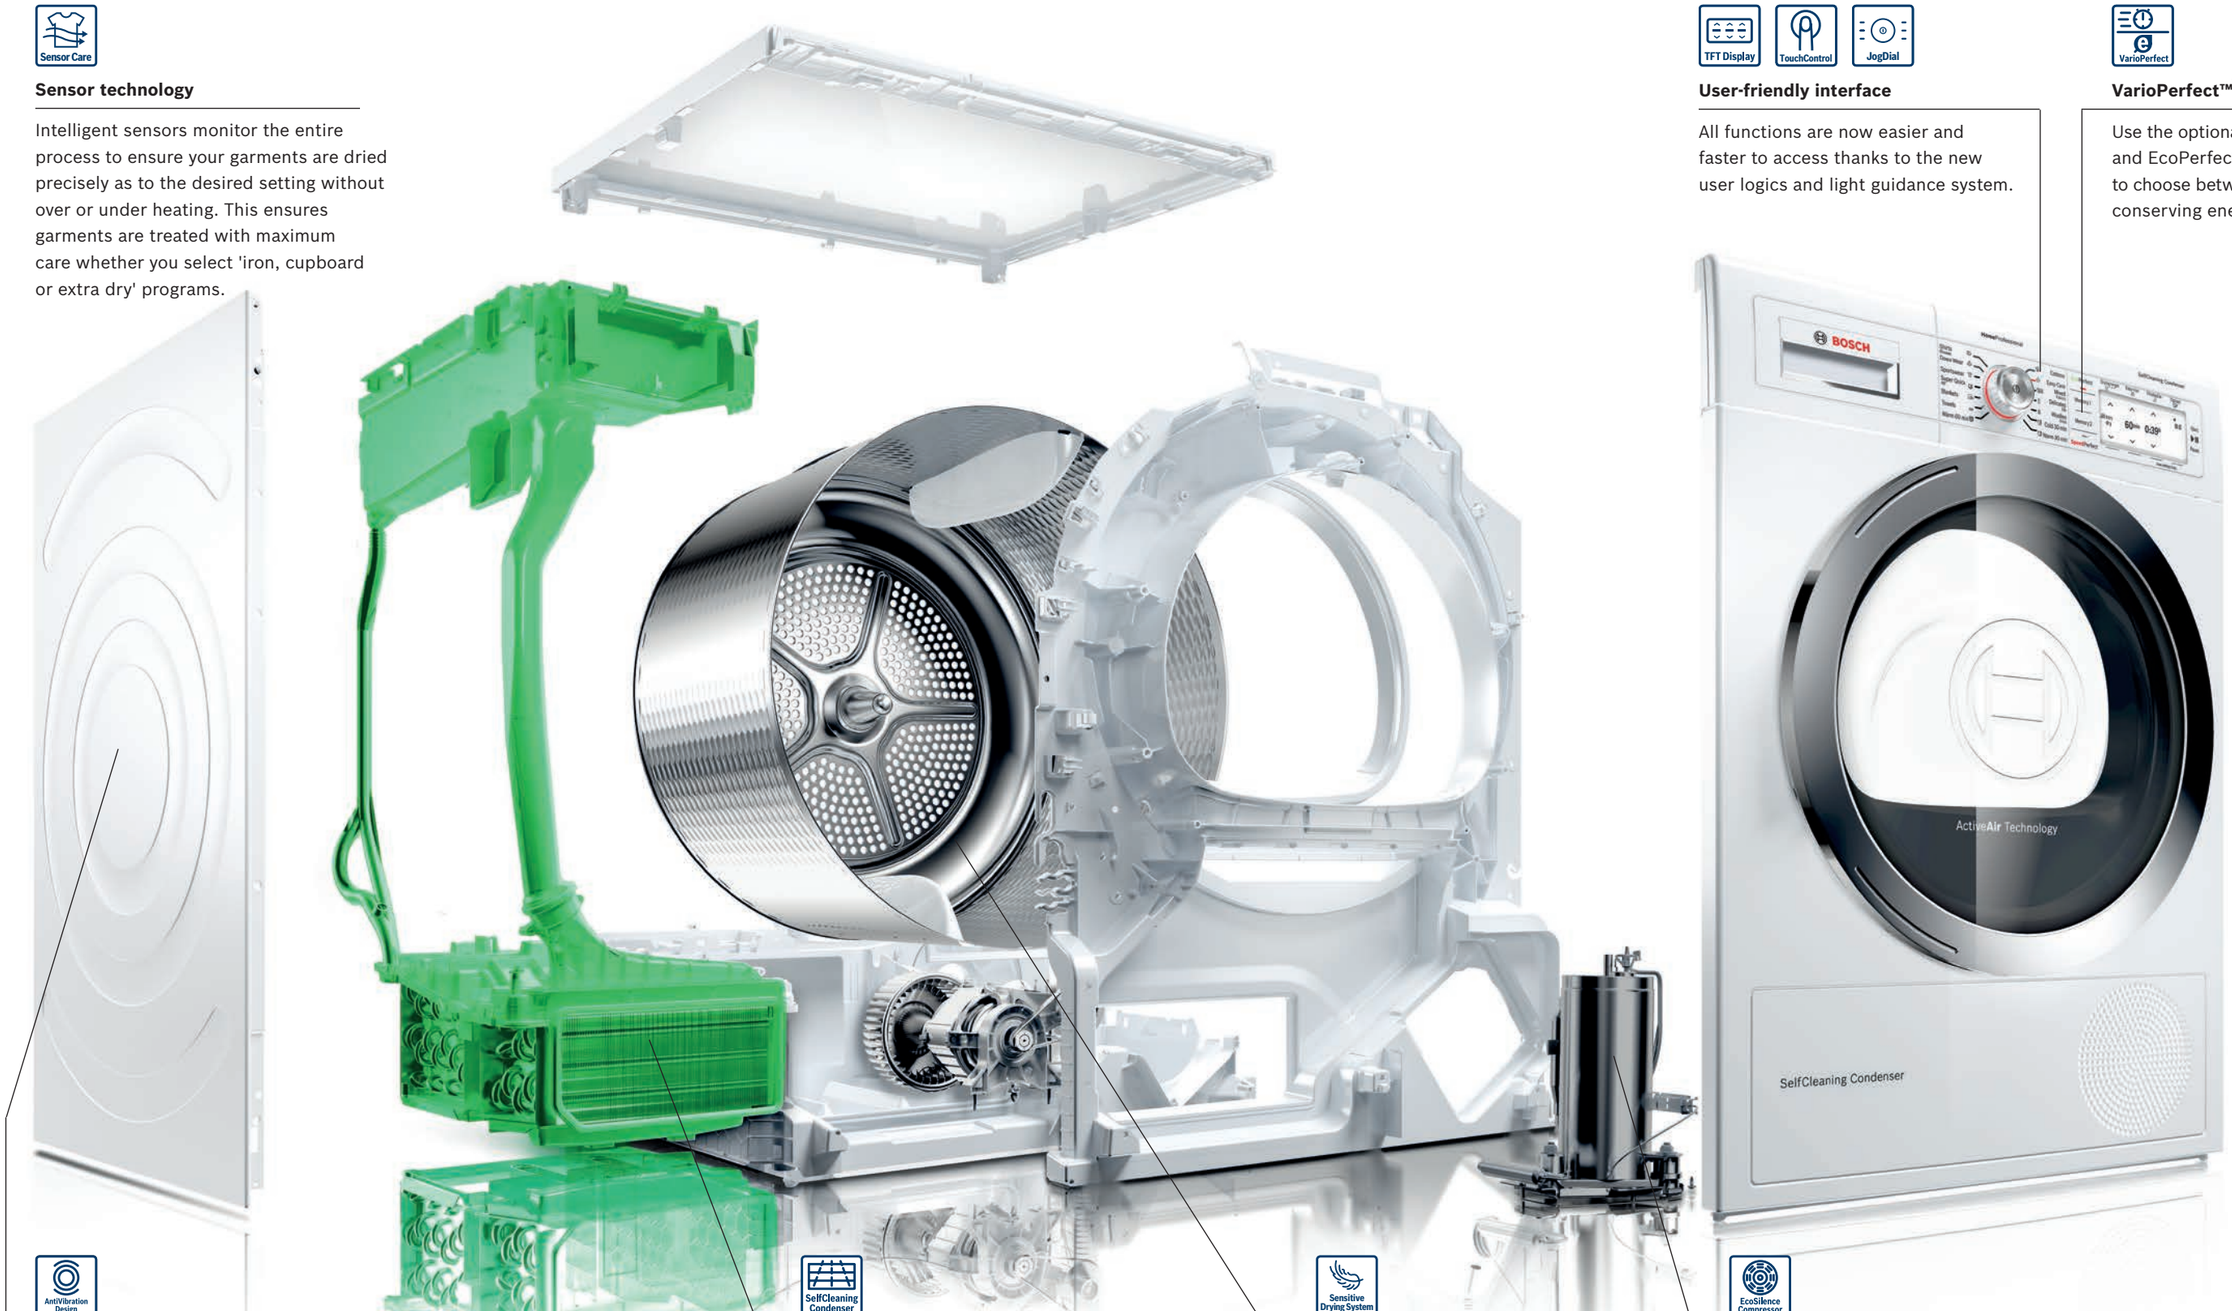
The Anatomy of Bosch Drying.

Sensor Care

Sensor technology

Intelligent sensors monitor the entire process to ensure your garments are dried precisely as to the desired setting without over or under heating. This ensures garments are treated with maximum care whether you select 'iron, cupboard or extra dry' programs.



TFT Display TouchControl JogDial

User-friendly interface

All functions are now easier and faster to access thanks to the new user logics and light guidance system.

VarioPerfect

VarioPerfect™*

Use the optional add-on SpeedPerfect and EcoPerfect options allow you to choose between saving time or conserving energy during drying.

AntiVibration Design

AntiVibration™-side walls

The AntiVibration™ design of the side walls in Bosch dryers is a focus of attention. Its construction ensures greater stability and less vibration during operation.

SelfCleaning Condenser

SelfCleaning Condenser™

The patented self-cleaning condenser not only saves you a chore of manual cleaning, it also ensures the dryer performs economically with optimal energy efficiency. It also outperforms the qualifying limit for a 6 Star energy rating dryer by 33%#.

Sensitive Drying System

Sensitive Drying system

A textile-friendly drum design and SoftFlow® paddles ensure soft, fluffy laundry. The large capacity drum (depending on model) additionally protects laundry and reduces creasing.

EcoSilence Compressor

EcoSilence compressor*

Thanks to the latest technology, the EcoSilence compressor switches off automatically when it is not required. This means that the motor not only lasts longer, but at the same time, saves a lot of electricity.

Features vary depending on model. Please check individual product specifications.
Tested in accordance with Australian Standard AU/NZ 2442. Information correct as of April 2013.

Features vary depending on model. Please check individual product specifications.
* Only applies to heat pump dryers WTW84360AU and WTY88700AU.

Dry Smarter with maximum efficiency.

Green Technology inside

100%

drying efficiency with the EcoSilence Compressor

EcoSilence Compressor

The centrepiece of the HomeProfessional dryer is the EcoSilence Compressor. Thanks to advanced technology, it compresses the refrigerant at high speed, which produces superior drying results no matter whether you wish to dry items extra fast or more economically.

SpeedPerfect

The SpeedPerfect option can be added to several drying programs for perfect, gently dried laundry in record time. Select SpeedPerfect, for instance, to dry a 3.5 kg load of easy-care garments to (cupboard) dry in just 36 minutes.

33%

more economical than the qualifying limit for 6 star energy rated dyers

EcoPerfect

Save even more energy with the add-on EcoPerfect option, turning selected Bosch dryers in to some of Australia's most economical dryers.

44¢^

109 kwh / 52 x 0.21 (cents) per use

For the cost of approximately one cup of coffee* the HomeProfessional dryer can dry over 7 loads of washing.

^www.energyrating.gov.au Cost based on current Victorian average for electricity as at April 2013, excluding service charges (44 cents per kWh). Only applies to HomeProfessional WTY88700AU. Tariff given is a general rate and for exact cost, adjust to your local electricity tariff detailed by your energy provider.
* An average coffee costs $3.50.

Flexibility – drying options for all your needs.

Intelligent

Drying features

In addition to the standard drying programs the following special programs are available on certain models.

Towels
Even heavy textiles are fully dried thanks to moisture-controlled programs in which the degree of moisture remaining in the garments is constantly measured. Terry towelling items like bath robes and hand towels come out soft and fluffy.

Down Wear
Down Wear
This special drying program is a moisture-controlled program with interval spinning. It dries up to 1.5 kg of down clothing to soft and feather-light perfection without the addition of agitating aids (e.g. tennis balls).

ActiveAir Technology

ActiveAir Technology
ActiveAir dryers are one of the most economical dryers on the market. The heat pump technology is designed to work without conventional heating. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

C Condenser

Condenser
Condenser dryers collect the condensed water vapour that occurs during the drying process in an easy-to-access container. As a result they do not require an external wall vent.

V Vented

Vented
Vented dryers exhaust the water vapour through a pipe at the back of the dryer, which must ventilate directly into the open air through an outside wall vent.

Sensor Care

Sensor Care
The built-in Sensor Care electronics monitor the moisture levels throughout the drying ensuring gentle handling, improved airing and less creasing, the results are simply perfect.

SelfCleaning Condenser

SelfCleaning Condenser
For maximum convenience, the condenser is automatically cleaned up to four times during the drying cycle. This eliminates manual cleaning which is required by conventional condenser dryers.

Sensitive Drying System

Sensitive Drying System
The Sensitive Drying System from Bosch is designed to pamper your clothes. With a large interior and an innovative sculptured drum surface, your washing is penetrated by a constant flow of gentle air from all sides. The unique SoftFlow® paddles rotate individual garments to take the rough out of the tumble and provide even drying results.

Glass Door

Glass Door
Selected Bosch dryers have a clear glass door, which offers maximum visibility during the drying program.

Timer 29

Timer
The time remaining display shows you how long is left in the program, while the delay function allows you to delay the start of drying for 60 minutes to 24 hours.

Easy Iron

Easy Iron
The reduced ironing feature with 2 setting options helps reduce creasing and extends the anti-creasing phase once the program has ended.

Low Heat Delicates

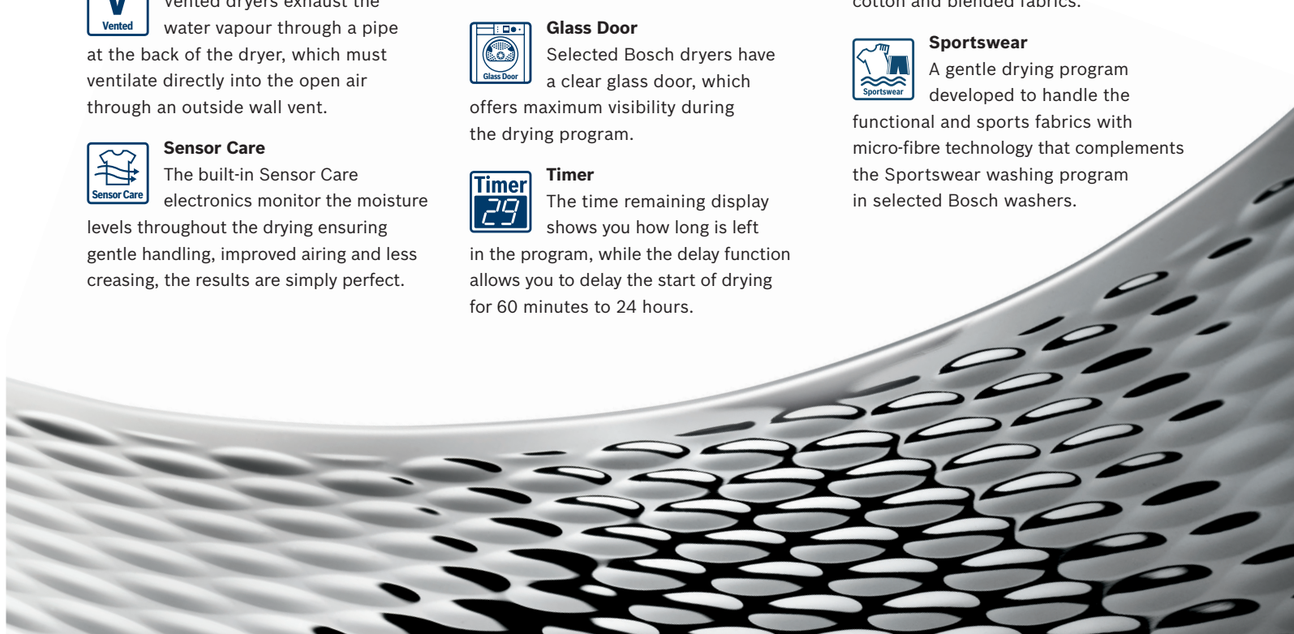
Low Heat Delicates
Bosch dryers have an innovative low heat feature that protects temperature sensitive textiles by automatically reducing the heat and extending the drying time.

40 SuperQuick

SuperQuick 40
The SuperQuick 40 option is designed for washing to be dried quickly - maximum 2 kg load. Specifically for synthetic fabrics, cotton and blended fabrics.

Sportswear

Sportswear
A gentle drying program developed to handle the functional and sports fabrics with micro-fibre technology that complements the Sportswear washing program in selected Bosch washers.



Bosch Dryers

The Bosch dryer range includes heat pump, condenser and vented dryers.

100% Washer.
100% Dryer.

Not only have we rolled two appliances into one, we've also made sure the Avantixx™ Wash+Dry is a top performer. At the touch of a button, it can easily wash 7 kg of laundry with 4.5 star water efficiency or effortlessly wash and dry 4 kg of laundry.

AirCondensation Technology™

Did you know that some washer/dryers use water to dry clothes? At Bosch, we think that's wasteful so we developed AirCondensation Technology™. Thanks to this revolutionary technique, the Avantixx™ condensation system uses air to dry your clothes instead of water, making it one of Australia's most water-efficient dryers.*

* In the washer/dryer category.

This much is for sure: you can trust in our service.

Reliable, experienced, fast. The customer service of Bosch; before and after purchase.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality even when it comes to after-sales service because no one knows Bosch appliances better than our highly trained service engineers. Working with the latest equipment for measuring, diagnostics and repairs, Bosch service engineers only use original Bosch spare parts.

Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care with high-quality materials. We promise it in our 2-year manufacturer's warranty on all appliances.

Lifetime service. It goes without saying at Bosch.

Once your warranty period is over, we are still there to assist you. You can rely on expert care and first-rate service throughout the life cycle of your appliance. From missing instruction manuals to appliance repair – we take care of everything.

Original accessories. Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high-quality appliance for many years to come. To help you do so, we offer a wide range of Bosch certified cleaning and care products.

Extensive customer service network. Just a call away.

Customer Care
Our friendly Bosch Customer Care team is on-hand to provide competent, reliable assistance. Before or after purchase, the Bosch team will be happy to advise you on products, their use and special functions.

Bosch Customer Care: 1300 368 339
Monday to Friday, 8:30am to 6:00pm.

Service & Repairs
Our team is there to provide the right advice on faults, arranging a visit of a service engineer and ordering the right accessories or spare parts.

Bosch Repairs & Service, Accessories and Spare Parts: 1300 360 447
Monday to Friday, 8:30am to 5:00pm.

Bosch Laundry Solutions brochure is printed in an environmentally conscious way, using inks containing linseed oils and stock manufactured to high environmental standards.

This material is printed on HannoArt Silk, manufactured by Sappi Fine Paper in Germany. The pulp for this paper is sourced from certified and responsibly managed plantation forests. ISO14001 EMS and EMAS certifications. 48% of Sappi's global energy requirements come from renewable sources.

The print company has a strict environmental policy and they are an FSC®-certified print company. They use initiatives such as computer-to-plate technology, water/isopropyl alcohol reductions in printing presses and recycling throughout the organisation. This is in addition to the ink selection as discussed above and in their advice to all clients on the environmental implications of paper selection and usage.

Certain appliances shown in this catalogue are not available in your country. Model numbers and specifications are for reference only and subject to change without prior notice. Please contact your local Bosch retailer for the latest information.
